

Announcing a merger of micro proportions.

The NeoKeys™ MicroLaptop.  
It merges the best of a PC  
with the best of a mobile phone.

## **A more competitive tool for a more competitive world.**

Between a cell phone, laptop, PDA and MP3 player, you probably have more than your hands full right now trying to stay connected.

In their place, we present something radically smarter: the NeoKeys MicroLaptop. An ingenious device that's designed to meet and exceed all your computing and communication needs—and small enough to slip into your pocket.

Currently in development, the NeoKeys MicroLaptop is optimized for broadband voice and data across the ubiquitous wireless Internet. Giving you, in brief, the world in the palm of your hand.

It's a PC.

It's a phone.

It's an MP3 player.

It's more.

You may think you see four devices here, but actually there's just one. Its patented interface changes dynamically according to whichever function you select. For a multimedia presentation, visit [www.neokeys.com](http://www.neokeys.com).

# One smart interface. Three intelligent expressions.

Mobile Phone

Remote Control

MicroLaptop

- We license the NeoKeys interface to cellular operators and handset manufacturers to implement in their handsets
- Makes advanced data services easy
- Gives users the power to enter commands, text and numbers without menu/select systems
- Differentiates on the elements consumers care about, increasing usage and revenue
- Highly flexible form factor
- Integrates keys with software driven LCDs
- Easily optimized for targeted demographic groups
- All user interface controls are implemented using the powerful NeoKeys keypad that makes service and applications fast and easy for the user through an "instant learn and use" interface system

- We license the NeoKeys interface to manufacturers of remote controls for home entertainment systems, laptops and PCs
- Provides "lean-back" experience for laptops and PCs with more power than a full PC keyboard and standard remote combined
- Provides full text entry for next generation interactive TV and TV with Internet access
- Easy multi-device controls implementing "what you see is what you need" (WYSIWYN)
- Mode-switching remote
- Full text entry in any language
- Full Web controls

#### Processing and memory

- 1.3 GHz processor
- 60-120 GB SSD NAND
- Graphics Accelerator
- 1 GB RAM

#### Communications

- Bluetooth
- 802.11g
- VOIP
- Cellular WAN

#### Size and weight

- Height: 4.1 inches
- Width: 3.1 inches
- Weight: 10-12 ounces

#### Operating System

- Windows XP/Professional (Vista)

#### Cameras

- Internal: Still and video
- External: Still and video
- Controls: NeoKeys interface has complete set of dedicated photography keys

#### Displays

- Internal: 60mm x 70mm 1024x800 TFT
- External: 36mm x 50mm 128x128 OLED

#### NeoKeys Interface

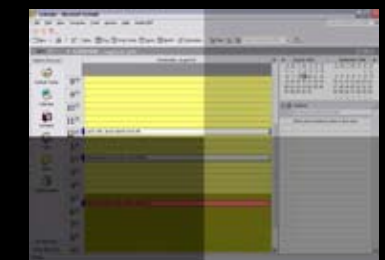

- Mode-switching puts the user in control — what you see is what you need (WYSIWYN)
- Commands, text and numbers

- the three elements of the next generation user interface
- More powerful and easier to use than a full PC keyboard
- Text in any language, in full
  - Accented letters
  - Asian characters
  - All punctuation
  - Any symbols
  - All editing keys and arrows

#### Display Controls

- Full-size viewing experience through screen shifting/zoom
- NeoKeys interface has dedicated set of instant-access screen control keys:

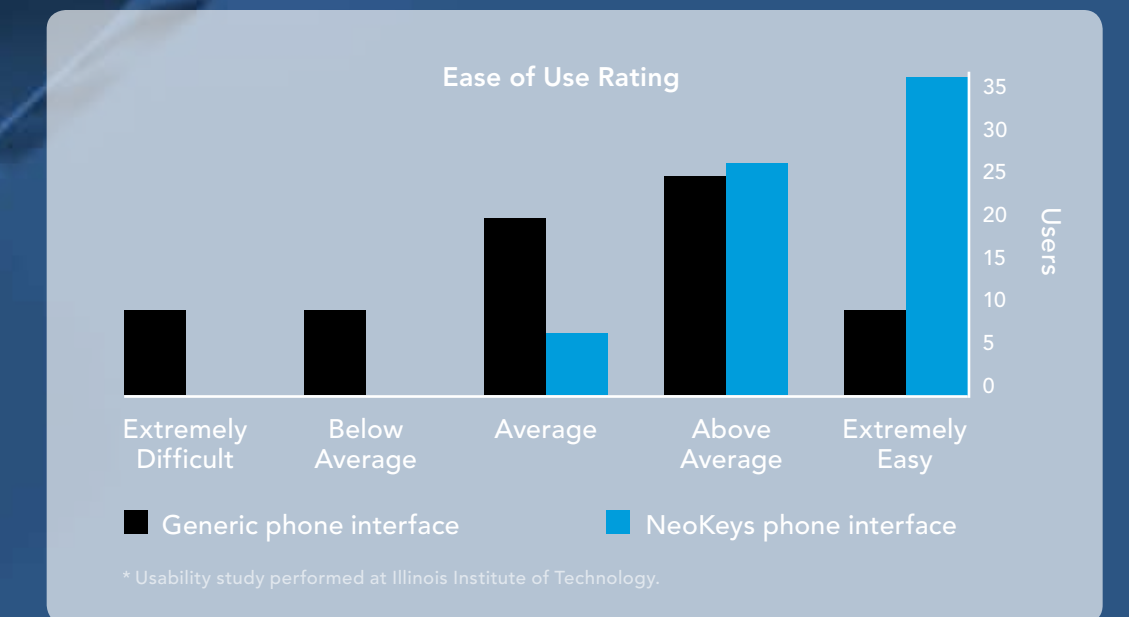

- zoom/magnify
- pan/scroll
- instant pre-set view shifts (center, upper left, lower right, etc.)
- instant screen on/off
- and more

## Yuvee, Inc.

# The digital DNA to do all things easily.

Yuvee, Inc. specializes in the design and development of advanced user interfaces optimized for broadband mobile devices and wireless networks. We license our patented NeoKeys interface to companies whose products require fast and easy input of commands, text, and numbers, including mobile phones and laptop or TV remotes. We are presently in the industrial design and engineering phase of the NeoKeys MicroLaptop. We are poised and ready to rock the world of mobile computing and communications. Care to partner with us?

For more information on the NeoKeys MicroLaptop or the NeoKeys interface, email us at [info@yuvee.com](mailto:info@yuvee.com) or visit [www.neokeys.com](http://www.neokeys.com). Yuvee, Inc. 490 Hazel Avenue Highland Park, IL 60035 U.S.A. 847.380.2092
